Subject: Asbestos

I worked at Gouv. Talc for years and left due to asbestosis per doctor's reports and msha and Gouverneur Talc states there is no asbestos in their products. Well ask all the old miners and millers that have left there whether there is asbestos in the mines or not. This is all my personal opinion but Mr. Kelse has no problem as I feel they are well insulated with their power, government backing and deep pockets. If there is no asbestos in their products how come the big loss of business the past years? How can you protect the workers? One way shut Gouverneur Talc down people have suffered enough. Thank You.
